LIVE STREAM STUDIO SETUPS PROFESSIONAL WEBINARS BROADCAST & PODCAST DIY STUDIO KITS

****SPECIAL OFFERS AVAILABLE FOR A LIMITED TIME**

With the current COVID lockdown limiting people's ability to travel, produce and seed content, there has never been a better time to install a studio set-up to create and publish content in your own business, or home.

We have put together three tiers of pop-up/flyaway studios that are easily accessible and affordable.

Whether you want to Live Stream, Video Conference or shoot, edit and distribute content on the usual platforms, we can help you get into production within a week.

Our packages pull together our decades of experience and knowledge of hardware and software that is capable, but user-friendly. We understand that technical terms are a foreign language to most people, so we can walk you through every step of the way.

We will arrange for all of the component parts to be delivered direct to your address, we can then dial in to show you how to assemble the parts, operate the software and ultimately get your messaging out while it really matters.

PAGE 4&5: TIER 1 - From £20k

PAGE 6&7: TIER 2 - From £10k

PAGE 8&9: TIER3 - From £5k

LIVE STREAM PACKAGE

TIER 2 - FROM £10K

This intermediate solution is based on the same technologies as our Tier 1 solution, but scales down both the resolution and the budget.

Two HD cameras, a large HD display and broadcast sound equipment form the same foundation for high-quality web conferencing, live streaming and remote interviews.

We can provide either fixed cameras with interchangeable lenses or robotic cameras that can be operated remotely.

- Two professional-grade HD cameras, lighting and sound equipment for two people
- Custom PC running VMix
- Can be remotely operated, using existing network cabling
- Live stream to any platform: YouTube, Facebook, Webex, Zoom etc
- Record your streams

LIVE STREAM PACKAGE TIER 3 - FROM £5K

This cost-effective solution includes the same professional lighting and sound equipment as our higher tiers, in a package that can be self-operated in a single room.

A fixed HD camera and large HD display support audience interaction.

- One professional-grade HD camera, lighting and sound equipment for one person
- Custom PC running VMix
- Can be self-operated
- Live stream to any platform: YouTube, Facebook, Webex, Zoom etc
- Record your streams

**WHILE WE PRESENT THESE OFFERS AS TIERS,
WE CAN OF COURSE TAILOR YOUR SYSTEM
TO YOUR NEEDS.**

**PERHAPS YOU REQUIRE ONLY A SINGLE-
CAMERA SYSTEM BUT WOULD PREFER IT TO
BE REMOTELY OPERATED.**

**MAYBE YOU'D LIKE TO CUT BETWEEN TWO
PRESENTERS SITUATED IN DIFFERENT ROOMS
IN THE SAME BUILDING?**

**OR MAYBE YOU'D LIKE TO STREAM FROM
THE KITCHEN BECAUSE THE LIVING ROOM
HAS BECOME A CLASSROOM.**

CROGA STUDIO BUILDS

WHO WE ARE

Croga is the industry leader in the design, construction and integration of custom studio solutions for bespoke media layout. We offer a 360 service from structural design through to media strategy, production services and channel management. Croga is Irish for brave, and we bring brave passion and thinking to all of our projects.

WHO WE SERVE

We offer unrivalled expertise and project management to broadcast, film, commercial and corporate clients wanting to produce, broadcast or stream their own content channels without the need for third party services.

WHAT WE OFFER

From multi-purpose sound stages to fully integrated automated live play-out facilities, we can provide custom studio solutions designed to meet specific production requirements of all scales. Our studios services include:

- Set Design
- Studio Customisation
- Construction
- Systems Integration
- Channel Management
- Media Strategy
- Legal & Compliance

YOUR TEAM

GED CLEUGH
Projects Director

Ged worked for more than 15 years as an award-winning television director and producer. He is experienced in exec producing, channel management and compliance as well as commissioning content for playout. Ged oversees all of our studio build projects and has delivered custom studio solutions for clients on all scales.

TOM GRIFFITHS
Project Manager

Tom is a qualified sound engineer with several years experience recording and mixing sound for film, TV and online. He brings a knowledge of acoustics and a broad technical background to the wide variety of challenges that each new studio brings.

CONSULTATION & PARTNERSHIP

Croga is not only an industry leading broadcast studio provider, we are also part of a creative collective that includes two working production companies for commercials, film and television. As such, we have thirty filmmakers and decades of industry expertise in house. Unlike our competition, it means that we live and work in production on a daily basis, therefore our decision making when it comes to kit provision and advice, workflows and media management is borne out of first hand experience and practical insight.

What we have provisioned in our proposals is our best assumption in relation to some of the processes and requirements based on our experience.

Should you find the solution that we are offering doesn't work for your budget; there are additional works and/or concessions that can be introduced. We pride ourselves on working within our clients' budgets, and offer many innovative solutions to ensure custom solutions are on spec and on budget. Especially in the field of filmmaking, there are several solutions to any given problem, and these usually come at different price points.

THANK YOU
FOR YOUR
CONSIDERATION
