LIVE STREAM STUDIO SETUPS

PROFESSIONAL WEBINARS
BROADCAST & PODCAST
DIY STUDIO KITS

With the proliferation of free to use broadcast platforms plus our ability to travel, produce and seed content, there has never been a better time to install a studio set-up to create and publish content in your own business, or home.

We have put together three tiers of pop-up/flyaway studios that are easily accessible and affordable.

Whether you want to Live Stream, Video Conference or shoot, edit and distribute content on the usual platforms, we can help you get into production within a week.

Our packages pull together our decades of experience and knowledge of hardware and software that is capable, but user-friendly. We understand that technical terms are a foreign language to most people, so we can walk you through every step of the way.

We will arrange for all of the component parts to be delivered direct to your address, we can then dial in to show you how to assemble the parts, operate the software and ultimately get your messaging out while it really matters.

- PAGE 4&5: TIER 1 - £25k+
- PAGE 6&7: TIER 2 - £10-20k
- PAGE 8&9: TIER 3 - From £5-10k

****SPECIAL OFFERS AVAILABLE FOR A LIMITED TIME**

For more information and to buy, email enquiries@crogastudiobuilds.com

LIVE STREAM PACKAGE

TIER 1: £25K+

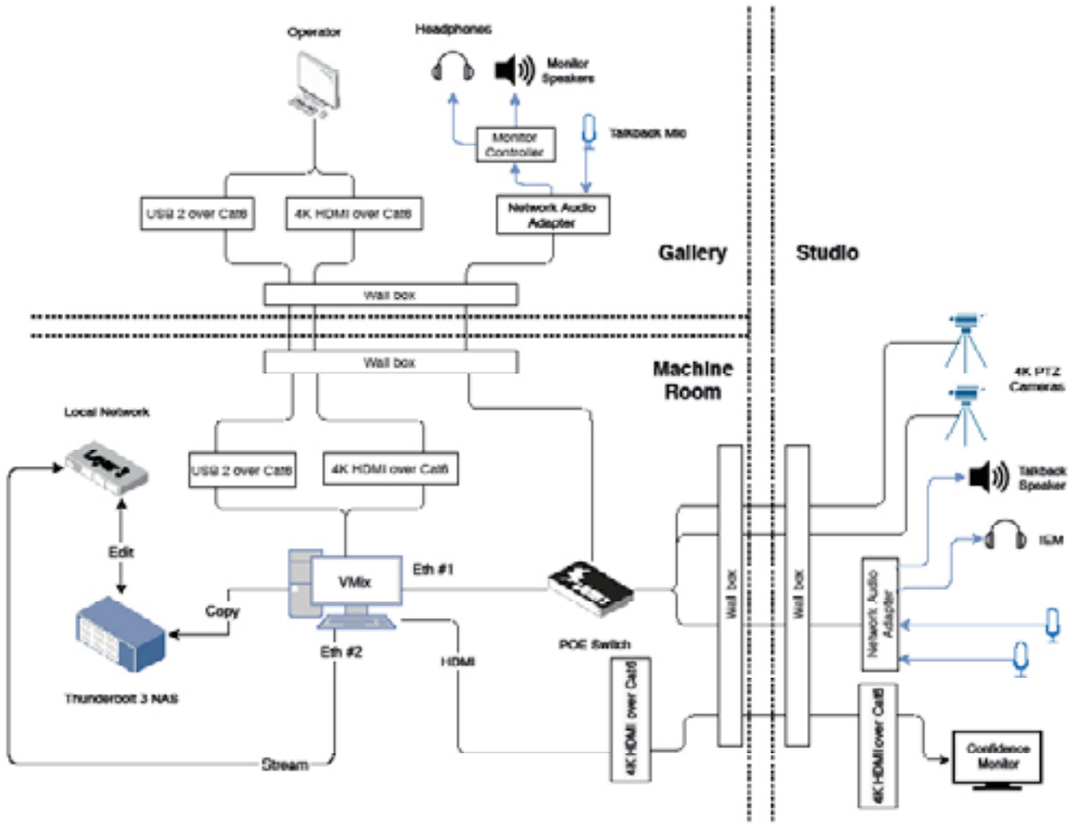
We have designed this flexible three-camera live streaming and recording studio to offer broadcast-quality 4K performance with a single, remote operator, and to run over existing network cabling without the need for new video or audio cable runs.

This will allow you to stream to any platform (YouTube, Facebook, Webex, Zoom etc), record individual camera streams for editing, and comes with a generous 24TB of NAS storage.

Interact with your audience or conduct interviews over Skype with a 43" 4K display and broadcast earpiece.

The remotely controlled cameras and the sound equipment send their data over your existing network cabling.

The live streaming system may be located in an existing server room, or with the operator.



No tools are required in order to get your studio up and running, and you can be streaming live within a matter of hours.

- Three professional-grade 4K cameras, lighting and sound equipment for two people together or located in separate rooms
- Includes a high-performance PC, custom-built to run VMix or Wirecast streaming software
- Also includes 24TB of network attached storage, with Thunderbolt 3 for rapid backups
- Can be remotely operated by one person, using existing network cabling
- Live stream to any platform: YouTube, Facebook, Webex, Zoom etc
- 4K display for web conferencing
- Conduct interviews over Skype or mobile phone
- Record individual camera streams and audio direct to disk for rapid editing

WHAT'S IN THE BOX

Documentation customized to your use-case
Two full days of installation / technical support
Two full days of training in camera, lighting and sound

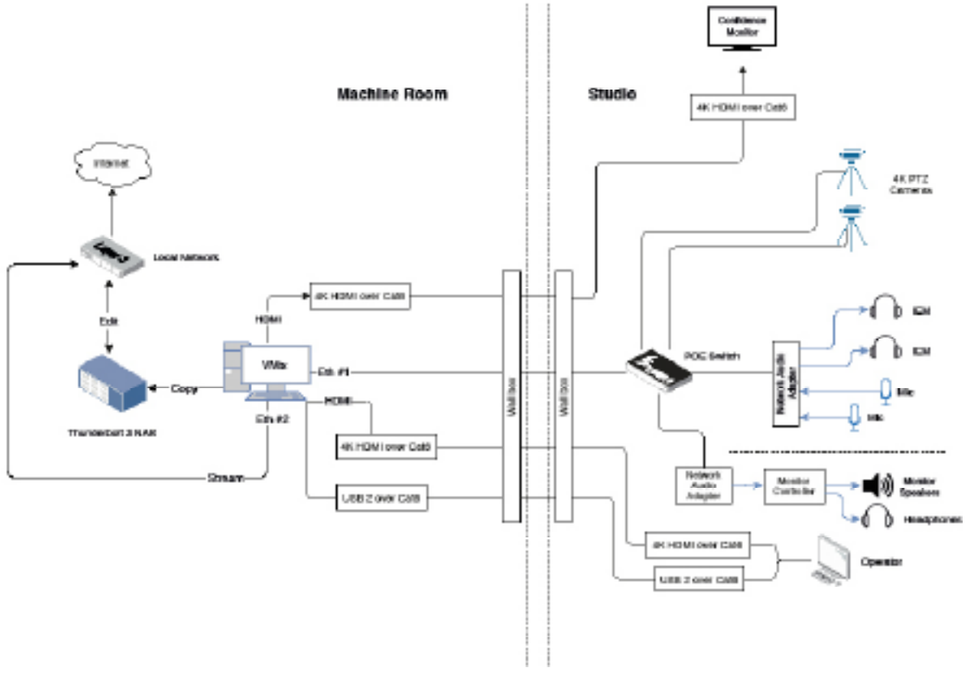
Custom built PC with hardware .h264 encoders
24TB NAS Drive: QNAP TVS-672XT
5-port PoE Switch
2 x 4K HDMI over Cat6 Extension Set (up to 75m)
All required cabling



LIVE STREAM PACKAGE

TIER 2: £10-20K

This intermediate solution is based on the same technologies as our Tier 1 solution.

Two HD remotely controlled PTZ cameras or two 4K fixed cameras, a large 4K display, plus professional lighting and sound equipment form the same foundation for high-quality web conferencing, live streaming and remote interviews.

This setup requires a single operator, who is positioned in their own room away from the presenter. No new cabling is required if there is network cabling already in place.

Two professional-grade HD PTZ or 4K fixed cameras, lighting and sound equipment for two people

Can be remotely operated, using existing network cabling

Live stream to any platform: YouTube, Facebook, Webex, Zoom etc

Conduct interviews over Skype or mobile phone

Record individual camera streams and audio for later editing

Optionally we can include a high performance PC that is custom-built to run VMix or Wirecast software, and a dedicated Thunderbolt 3 NAS drive.

All required cabling

LIVE STREAM PACKAGE

TIER 3 - FROM £5-10K

This cost-effective solution includes the same professional lighting and sound equipment as our higher tiers, in a package that can be self-operated in a single room.

A 4K cinematic camera and is at the heart of the studio, and the kit comes with the same professional lighting equipment and microphones as our more expensive options.

This package contains everything you need to run a broadcast-quality stream from your home, and includes the tech-suSpport you need to get up and running, including instruction on lighting and sound.

- One professional-grade 4K camera with tripod
- Lighting and sound equipment for one person
- Can be self-operated
- Live stream to any platform: YouTube, Facebook, Webex, Zoom etc
- Desktop or laptop computer required
- Optional extras include a large 4K display and studio speakers for audience interaction

WHAT'S IN THE BOX

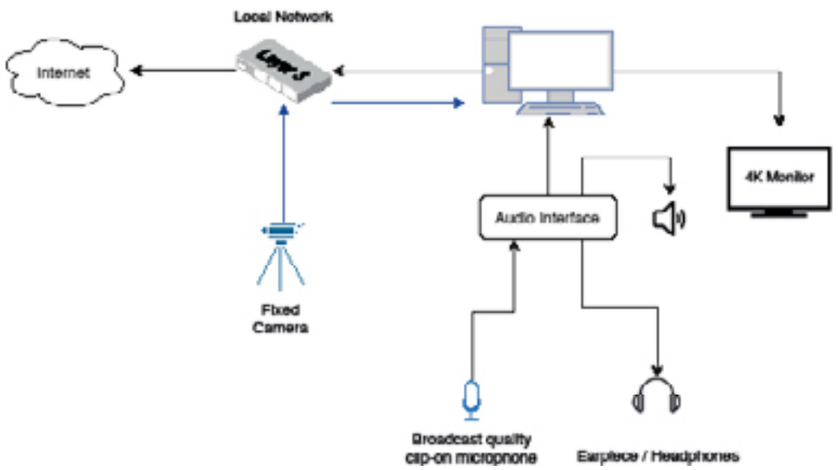
2 x LED Light Panels: Aputure Araman HR 672
2 x Diffusion Umbrellas
2 x Light Stands

43" 4k Display: Hisense H43B, with tripod stand

Audio Interface: Steinberg UR22C
Speakers: 2 x Presonus Eris E5
Lavalier Mic: Shure SM93
Earpiece set: Shure SE215 with volume controller
All required cabling



WHILE WE PRESENT THESE OFFERS AS TIERS, WE CAN OF COURSE TAILOR YOUR SYSTEM TO YOUR NEEDS.

PERHAPS YOU REQUIRE ONLY A SINGLE-CAMERA SYSTEM BUT WOULD PREFER IT TO BE REMOTELY OPERATED.

MAYBE YOU'D LIKE TO CUT BETWEEN TWO PRESENTERS SITUATED IN DIFFERENT ROOMS IN THE SAME BUILDING?

OR MAYBE YOU'D LIKE TO STREAM FROM THE KITCHEN BECAUSE THE LIVING ROOM HAS BECOME A CLASSROOM.

CROGA STUDIO BUILDS

CROGA STUDIO BUILDS

Croga is the industry leader in the design, construction and integration of custom studio solutions for bespoke media playout.
